- 30 sec. live chat FRT

Getting started with Influx:

[Influx](#) provided a [24/7 solution](#) of 10 agents and 2 contingency agents with recruitment, training, and management included. The team quickly scaled up to 22 agents, with 4 client team leads (CTLs) working alongside 8 internal agents. The team handled tier 1 support, including customer queries, complaints post-travel, reservations, and general questions regarding Suntransfers' procedures and third-party suppliers.

The team also handled pre-sales support related to pricing, availability, and service information, as well as travel assistance for customers in the event of any kind of failure occurring during a transfer service and intermediation between customers and transport operators. As a flexible solution, the Influx team scales up 3x to meet Suntransfers' customer demand during high season to 30 voice-capable agents. Influx's quick and efficient service gives Suntransfers the opportunity to focus on growth by improving customer service operations and knowing their customers are in good hands.
